

Coroutines Cancellation

We've already cancelled coroutines and even entire scopes in this course...

... but had to resolve to ugly hacks and had no fine-grained control over the timings

Coroutines cancellation is tricky because it must be “cooperative”

Coroutines Cancellation Summary

Coroutines cancellation is tricky because it must be “cooperative”

There is no “one size fits all” solution for Coroutines cancellation

In some cases, you'll need to use `NonCancellable` to protect critical parts of your code from being cancelled during execution

When working with Coroutines, always remember that the execution can be cancelled at any time
